

# RADCOM ASSURANCE

5G ASSURANCE STARTS AND ENDS WITH RADCOM ACE

For Standalone and Non-Standalone 5G

## AUTOMATED

Fully automated 5G assurance platform that integrates with Kubernetes (K8).

## KUBERNETES

Manages RADCOM ACE microservice components for instantiation, scaling and updates.

## AI-DRIVEN INSIGHTS

Utilizes Artificial Intelligence and Machine Learning for automated insights (anomalies, root-cause analysis).

## RADCOM I.C.O.N

A single, containerized stateless component for collecting network events and Event Data Records (EDRs).

## FULL CI/CD

Full Continuous Integration and Continuous Delivery (CI/CD) process for ongoing and rapid product updates.

## END-TO-END

Correlates multiple data sources (packets, events and event data records) from the 5G RAN to the 5G core.

## CLOUD-AGNOSTIC

Deployed on public, private and hybrid clouds and decoupled from hardware dependencies.

## NETWORK INTELLIGENCE

Delivers Key Quality Indicators (KQIs) from the RAN to the core for an end-to-end view of the customer experience.
