

FOR IMMEDIATE RELEASE**RADCOM to Present at the Needham Virtual Security,
Networking, and Communications Conference**

TEL AVIV, Israel – October 28, 2020 – RADCOM Ltd. (Nasdaq: RDCM) announced today that Eyal Harari, Chief Executive Officer, will present at the Needham Virtual Security, Networking, and Communications Conference on Tuesday, November 17, 2020 at 4:30 PM Eastern Standard Time.

Management will be available for virtual one-on-one meetings during the conference. To schedule a meeting, please contact your Needham salesperson or Miri Segal at msegal@ms-ir.com.

A live webcast of the presentation will be available to the public at <https://wsw.com/webcast/needham104/rdc/2231210>. The webcast will be archived for 90 days following the live presentation. The presentation slides will be available on the day of the presentation from RADCOM's website www.radcom.com/investor-relations.

###

About Needham Virtual Security, Networking, and Communications Conference

Rapid change in technology is resulting in M&A, disruption, and emergence of new winners. These are evident up and down the IT stack from the optical layer to the application layer and across a myriad of industries segments. And in the disruption due to trade wars and the impacts of the Huawei on-again off-again trading ban and few periods have seen this much change in such a short time. The Needham Security, Networking and Communications conference provided a vivid window into these markets and companies. One-on-one meetings were available to qualified investors.

About RADCOM

RADCOM (Nasdaq: RDCM) is the leading expert in 5G ready cloud-native, network intelligence solutions for telecom operators transitioning to 5G. RADCOM Network Intelligence consists of RADCOM Network Visibility, RADCOM Service Assurance, and RADCOM Network Insights. The RADCOM Network Intelligence suite offers intelligent, container-based, on-demand solutions to deliver network analysis from the RAN to the core for 5G assurance. Utilizing automated and dynamic solutions with smart minimal data collection and on-demand troubleshooting and cutting edge techniques based on machine learning, these solutions work in harmony to provide operators an understanding of the entire customer experience and allow them to troubleshoot network performance from a high to granular level while reducing storage costs and cloud resource utilization. For more information on how to RADCOMize your network today, please visit www.radcom.com, the content of which does not form a part of this press release.
